

TECHNICAL BULLETIN

TRISPERSE SN POWDER

DESCRIPTION:

Trisperse SN Powder is a highly effective dispersing agent for use where an anionic dispersing agent is required.

Trisperse SN Powder is low foaming and does not cause the noticeable staining associated with ligno-sulfonate dispersants.

Trisperse SN Powder prevents the agglomeration of Disperse dyes at higher temperatures.

PHYSICAL PROPERTIES:

Appearance:	Light brown powder.
Chemical Nature:	Naphthalene sulfonate.
Ionic Nature:	Anionic.
pH:	7.0 - 8.0
Solubility:	Easily soluble in warm water.
Stability:	Stable under most processing conditions. Not stable with cationic products. Avoid high concentrations of alkali

STORAGE:

Store in sealed container away from strong heat.

SAFETY:

Not considered hazardous but avoid prolonged skin contact.

The data and suggestions contained herein are offered in good faith and based on information, which we believe is reliable. However, no warranty is expressed or implied regarding the accuracy of this data or use of the product since the conditions and methods of use are beyond our control. Nothing contained herein shall be construed to imply the non-existence of any relevant patents nor to constitute a permission, inducement or recommendation to practice any invention covered by us or others, without authority from the owner of the patent.
