# TRITEXAINE CB-45

### DESCRIPTION:

**Tritexaine CB-45** is a high active cocamidopropyl betaine, CAS # 61789-40-0. The product reduces irritation of anionic surfactants and exhibits mildness approaching traditional amphoterics.

### SPECIFICATIONS:

<b>Appearance:</b>	clear pale yellow liquid.
<b>% Solids:</b>	44.0-46.0
<b>pH (as is):</b>	6.0-7.0
<b>Color (APHA):</b>	200 Max.
<b>Sodium Chloride:</b>	5.8-7.3%.
<b>Solubility:</b>	Soluble in water & alcohol

### TYPICAL PROPERTIES:

- Rich foaming properties
- Compatible with anionic cationic and nonionic surfactants
- Excellent wetting and dispersing properties
- Stable in concentrated acidic and alkaline formulations

### APPLICATION:

- can be used in shampoo, bubble bath, liquid hand soap formulations
- used in the production of oil drilling muds
- Typically used between 5-10% in combination with anionic surfactants and alkanolamides
- Has a low cloud point making low temperature blending possible
- in acid conditions it becomes cationic which is desirable in hair conditioner formulas.

### STORAGE:

Tritexaine CB-45 is recommended to be stored in sealed containers at room temperature. Overheating or freezing should be avoided. If freezing occurs slowly apply heat and agitation to ensure product is homogeneous before use.

The data and suggestions contained herein are offered in good faith and based on information, which we believe is reliable. However, no warranty is expressed or implied regarding the accuracy of this data or use of the product since the conditions and methods of use are beyond our control. Nothing contained herein shall be construed to imply the non-existence of any relevant patents nor to constitute a permission, inducement or recommendation to practice any invention covered by us or others, without authority from the owner of the patent.
